Team Meeting

1. **Check in from last meeting/ Attendance**
   03/27
      - Jaren, Jared, Brandon and Colton attended
      - Everyone had a chance to look over Milestone 5 requirements
      - Reviewed Milestone 4 grading and feedback

2. **Project Updates**
   - Milestone 4 TODOs and new tasks for Milestone 5 added to Jira Board
   - Assigned to each other the tasks on the Jira Board

3. **Individual Task Updates**
   - Split up the tasks umongst the team
   - Everyone has a coding portion that they are responsible for handling.

4. **Planning Ahead**
   - Outlined a plan to complete all of the coding by next meeting so that we can spend the second week on documents and debugging.
   - Noting that this is the last coding portion, make sure that the code is running perfectly so that we won't have todos for the next section
   - Project is Due April 12th

5. **Problem-solving**
   - What is going on with that weird bug that we keep getting docked on?

6. **Communication**
   - Communication via text group chat and notifications from Jira and GitHub

7. **Wrap up and Notes for next time**
   - Reach out to Professor about Milestone 3 regrade
   - Complete working version of project by next time, smooth out code later
   - Next Meeting is 4/03 at 7pm

Team Meeting

1. **Check in from last meeting/ Attendance - 04/03**
      - Jaren, Jared, Brandon and Colton attended
      - Everyone is mostly done with the code, the bug from Milestone 4 TODOs are still there, as well as new 6 word bug

- Colton is struggling with the multiple instances, could use help from the team
- Will finish debugging by next meeting, with all of the Docs.

2. **Project Updates**
- Went through the code to make sure it all made sense and was clear.
- Tested and confirmed the 6 word code and 250 lines work
- multiple copies of the code is still not working.

3. **Individual Task Updates**
- Colton Needs help with the multiple instances
- Jaren is going to handle the 6 word bug
- Jared is going to handle the Milestone 4 bug
- Brandon to help out with updating and testing, as well as cleaning the code

4. **Planning Ahead**
- Have everything ready to submit by next Wednesday, so we can spend the next two days just testing
- Project Due next Friday but we should be good to go.

5. **Problem-solving**
- Team worked together to get the multiple windows and objects of the code working.

6. **Communication**
- Communication via text group chat and notifications from Jira and GitHub

7. **Wrap up and Notes for Next Time**
- Complete all assignments and documentation by next meeting to be reviewed
- Next Meeting is 04/10 at 7pm

Team Meeting

1. **Check in from Last meeting/ Attendance 04/10**
- Jaren, Jared, Brandon and Colton Attended
- All code and documents are pretty much completed.

2. **Project Updates**
- Code is running smoothly and has been cleaned up nicely
- All code bugs have been fixed and all functionality is working Great

3. **Individual Task Updates**
- Everything is working, only thing now is to test and troubleshoot to confirm there are no issues.

4. **Planning Ahead**
- Troubleshoot everything so we are ready to submit for Friday

5. **Problem-solving**
- Ran all of the test files together to confirm there was no bugs.

6. **Communication**
- Communication via text group chat and notifications from Jira and GitHub

7. **Wrap up and Notes for next time**
- Submit on Friday
- Next meeting is 04-17
